## Air-Cooled Water Chiller LX1700ACC

**Email:** [info@labdex.com](mailto:info@labdex.com) **website:** [www.labdex.com](http://www.labdex.com)

## Description

Air-Cooled Water Chiller LX1700ACC an easy to operate, safe, energy-conscious and low noise equipment designed for continuous operation. They are well equipped with stainless steel tank and water pump along with digital display. Using highly precise temperature control and high efficiency compressor, they provide stable and reliable performance.

## Specifications

|                     |                                              |
|---------------------|----------------------------------------------|
| Water tank capacity | 30 L                                         |
| Temperature range   | 2153.1 Kcal/h                                |
| Cooling capacity    | 2.6 kW                                       |
| Cooling fan         | 0.135 kW                                     |
| Evaporator          | Tank + Coils                                 |
| Condenser           | Efficient brass sets corrugated aluminum fin |
| Compressor          | Hermetic Scroll Type or Piston               |
| Refrigerant         | R407C                                        |
| Power supply        | 1 Phase / 220 V / 50 Hz                      |
| Pump                | 0.37 kW                                      |
| Dimension           | 800 x 490 x 800 x mm                         |
| Weight              | 94 Kg                                        |

## Features

- ˆ Temperature range is 2153.1 Kcal/h
- ˆ Energy-conscious
- ˆ Overloaded protection from current and pressure protection
- ˆ Digital display showing water temperature
- ˆ Refrigerant type of R407C
- ˆ Compressor type: Hermetic scroll type/piston
- ˆ Evaporator with a tank-and-coil design
- ˆ Stainless steel tank and water pump

## Applications

- Water chiller are used in basically laboratory, food industry, biotechnology, packaging, laser etc.
